GCSE	6 A-C grade GCSEs including (B) for both English Language and English Literature.	

Employment History

- **Durham Federation**
Durham Community Business College & Fyndoune Community College
Web Developer (Full-time)   **July 2006 ~ Present**

After finishing University I was offered a position working in two partner schools that had formed a federation. The role involves establishing communication between the Intranets I had implemented at each site, as well as provide a more general web orientated presence including updating and maintaining various external web sites.

- **Durham Community Business College**
Consultancy (Part-time)   **September 2005 ~ June 2006**

I returned back to University to complete the final year of my degree. I was approached to continue providing development of some of the projects I had undertaken, including the now most successful one; a staff Intranet. The Intranet ongoing role was to lower the amount of paper-based administration and increase productivity. I also provided a minor support role to the project I had been involved in on my placement, which was now in its final year.

- **DfES Pathfinder Project – Fit4Employment**
Web Developer (Placement)   **August 2004 ~ September 2005**

A sandwich year placement based at a DfES Pathfinder Project, developing work-based learning. Initially the role simply involved content management of the project's web site. Shortly after starting the placement, my role was quickly expanded to make the most of my skills, in particular developing dynamic manageable sites for the partner schools and organisations involved in the project. Additional tasks involved networking (both wired and wireless), web server configuration and maintenance, promotional posters, presentations and foam boards as well as digital photography in various locations to be used in promotional media.
